2002 TCDC Training Workshop on Small Hydro Power

TCDC (Technical Cooperation among Developing Countries) SHP Training Workshop was closed at Hangzhou Regional Center for Small Hydro Power (HRC) on 18 Nov 2002. Attended altogether 23 participants from 14 Asian and Oceanic countries.

HRC's certificates were issued to them. With their national dresses, the international participants were excited and active in presenting comments or speeches on the SHP training at HRC at the closing ceremony. Though the duration of 40 days is short, the participants benefited much from the training. The monitor of the class, Mr. Wongsavadi from Thailand addressed: "We all feel to have learnt a lot from the SHP training workshop implemented by HRC. The subjects covered were just appropriate for our countries. We'll apply the SHP technology and experience we have learnt here in China into our work back

home. The kindness and hospitality shown by the friendly Chinese people were unforgettable. On behalf of all the class, I am here to say: "Thank you, HRC!" Some of the participants burst into tears when they reluctantly left HRC for their home countries.

This training workshop is sponsored by Chinese Ministry of Foreign Trade and Economic Cooperation, as one of the technical collaborative projects among the developing countries. All the lodging, boarding, training, pocket money and the domestic transportation fees are borne by the Chinese government. This is part of the Chinese contribution to South-South cooperation.

**A Chinese Magazine "Small Hydropower" by HRC**

The Chinese "Small Hydropower", a magazine that National Research Institute for Rural Electrification (NRIRE) and Hangzhou Regional Centre (Asia-Pacific) for Small Hydro Power has edited and published for 105 issues (bimonthly), allocated with the International Standard Serial Number ISSN 1007-7642, and China Standard Serial Number CN33-1204/TV. It was published in Chinese and with English titles. Special features are technical experience of SHP development in China. Information of international SHP activities and important events in the field of SHP have also been widely included.

This magazine has carried news, views and articles on all aspects of small hydro power. It is useful to those who are interested in technical experience of SHP development in China.

"Small Hydropower" is the only professional publication on small hydropower in China, which is issued domestically and abroad. It is widely circled in all corners of China concerning SHP, and getting more and more popular in over 900 rural counties which is primarily hydro-electrified, more than 2,300 counties with hydropower resources, more than 50,000 small-sized hydropower stations, thousands of colleges or universities, research institutes and other administrative authorities on SHP. Advertising is welcome for any equipment manufacturer to target Chinese market on SHP construction, equipment purchasing or other businesses.

Subscription rates (1 year): USD40.00
